Tooling

Cole Tool & Die has highly experienced and qualified staff to design, build, and repair your dies to your specifications. We specialize in the design and build of line, transfer, and progressive dies.

Using 3-D model building and programming software, our highly trained engineers create plan views, section views, and stock lists, including a full set of detail prints. Die components are then programmed and machined to CAD data in our fully equipped shop. Quality, attention to detail, and complete production testing assures customer satisfaction.

Whatever your tooling needs, Cole Tool & Die can provide the design, build and repair services you need.
